

《含能材料》2003年1~3期被 Ei page one 收录论文

题名	第一作者	出版年卷期页
Study on synthesis of 1,1-diamino-2,2-dinitroethylene	CAI Hua-qiang	(2003)11-01-0001-03
Study on hydrogenolysis of HBIW and crystal structures of the reaction products	LIU Jin-quan	(2003)11-01-0004-04
Investigation in the detonation network layout	Manfred Held	(2003)11-01-0008-05
Experimental study on the impact damage of selected explosives	CHEN Peng-wan	(2003)11-01-0013-05
Estimation of the critical temperature of thermal explosion for energetic materials using non-isothermal analysis method	HU Rong-zu	(2003)11-01-0018-06
Thermal expansion of TATB-filled polymeric material	LI Yu-bin	(2003)11-01-0024-04
Research on gas evolution of silicon cushion materials	ZUO Yu-fen	(2003)11-01-0028-04
Study on the stability of benzotrifuroxan with trace impurities	CHEN Jie	(2003)11-01-0032-05
Experimental studies on the cellular structure of detonation waves of hydrocarbon fuels	XU Xiao-feng	(2003)11-02-0057-04
Experimental analysis and exploration on the coupling of shell-steels to explosion performances of explosive loadings	CHEN Xue-lian	(2003)11-02-0061-05
Numerical simulation for detonation drive of fragment generators	QU Ming	(2003)11-02-0066-05
Studies on the application techniques of explosion-dispersed composite interfering smoke agents	YIN Xi-feng	(2003)11-02-0071-05
Preparation of nanocomposite CuO · PbO and its catalysis on thermal decomposition of RDX	HONG Wei-liang	(2003)11-02-0076-05
Thermal properties of main by-products in TATB	LI Bo-tao	(2003)11-02-0085-03
Studies on the behaviors of dust explosion of aluminum and RDX powders	CHEN Wang-hua	(2003)11-02-0091-03
Progress in applications of nanocomposites to propellants	XU Hui-xiang	(2003)11-02-0094-05
Research and development on energetic binders for propellants abroad	HE Li-ming	(2003)11-02-0099-04
Design of serialization explosive-loading device	JIN Ke	(2003)11-03-0113-03
Ab initio study on the intermolecular interaction of methyl azide dimers	XIA Qi-ying	(2003)11-03-0116-07
Preparation of HMX crystals with defects and the influences of crystal defects on thermal sensitivity and stability	HUANG Heng-jian	(2003)11-03-0123-04
Critical initiation parameters of hot-spots and impact sensitivity of melt-cast explosives	ZHAO Sheng-xiang	(2003)11-03-0127-03
Estimation formulae of the critical rate of temperature rise for thermal explosion of exothermic decomposition reaction system of energetic materials	HU Rong-zu	(2003)11-03-0130-04
Properties of smokeless cross-linked modified double base propellant	FAN Xue-zhong	(2003)11-03-0134-04
Effect of ignition intensity in composition B on the burning behavior	WANG Shi-ying	(2003)11-03-0141-03
FIR and LR spectra of four polymorphs of hexanitrohexaazaisowurtzitane	WANG Jian-long	(2003)11-03-0144-02
Synthesis of polynitropolyphenylene	YU Zhan-long	(2003)11-03-0146-03
Synthesis of 1,3-diazido-2-nitryloxypropane	GUO Shao-jun	(2003)11-03-0149-04
New method of RDX coated with nitrocellulose	LIU Xiao-gang	(2003)11-03-0153-02
Stability of CL-20 in concentrated sulfuric acid	HE Fang	(2003)11-03-0155-03
